**Stormwater Ordinance
Erosion & Sediment Control
Exemption Statement**

The Morgan County Stormwater Ordinance requires all land disturbance over one-half (1/2) acre to obtain an Erosion and Sediment Control Permit from the Office of the County Surveyor.

A parcel of land **not part** of a larger **permitted** development (Subdivision or a Minor Subdivision permitted by the County Surveyor's Office) that will be disturbing **less than 1/2 acre** of land will be exempt from a formal Stormwater Review.

To qualify for this exemption, the land-disturbing project cannot be part of a larger project that will add to the total land disturbance. If additional land-disturbing projects are planned and the total land disturbance will be greater than one-half (1/2) acre, a formal review will be required. (Example: building a house now and planning to build a pole barn later.)

I State that:

At the following Building Site, (address) _____, there will be less than one-half (1/2) acre of land being disturbed during the construction of this project. This project is not part of a larger project that will add to the total land disturbance.

I understand this Exemption Statement does not exempt me from violations of the County Ordinance. It will be my responsibility to minimize the silt and debris leaving my construction site, keep tracking onto a public roadway to a minimum and have an adequate concrete washout area.
